

NIST 800-171/CMMC Cybersecurity Solution – CMMC Made Simple

Core Business Solutions provides a turn-key solution for customers to ensure compliance throughout the United States for the Defense Industrial Base in accordance with today's security demands.

ASSESSMENT, TRAINING, and CONSULTING

- Online assessment and training for your Staff
- Online training for Management
- Consulting support to complete necessary documents
- Assistance with controlling documents
- Employee security training

DOCUMENTS

- A guided self-assessment and System Security Plan (SSP)
- A Plan of Action and Milestones (POAM)
- Customizable Security Policy Templates
- Security Metrics, Objectives, Actions and Incident Documentation
- Management Review template

CMMC MANAGEMENT SYSTEM SUPPORT

- CORE Security Suite
- Dashboard Progress and Accountability Reporting
- Management Dashboard
- Autocreation of SSP/POAM documents and generation of SPRS Score
- Usage of Autoforms associated with the CORE Security Suite
- Control of policies and documentation in the CORE Security Suite

See more details on the next page.

CORE SECURITY SUITE

- System Security Plan (SSP)
- Plan of Action and Milestones (POAM)
- SSP Dashboard
- Security Change Log
- Risk Register
- Security Incident Management
- Asset Management
- CORE Autogenerates your SSP, POAM, and SPRS Score for the DoD database based on your input.

CORE Vault®

A Cloud-Based CUI Enclave Solution

- VDI (Virtual Desktop Infrastructure) remote desktop (Windows 10 with 100 GB encrypted storage)
- Hosted in FedRAMP authorized and equivalent environments
- MS Office GCC High
- Secure Encrypted Email
- Network Security includes firewalls, intrusion detection/ prevention systems (IDS/IPS)
- FIPS 140-2 Validated Encryption
- Segregated Backup and Recovery
- SIEM/SOC (Security Information and Event Management, 24x7 Security Operations Center)
- User Access Controls
- Maintenance and Patching

Annual support includes security awareness training and updates on SSP/POAM/SPRS Score.

We can provide much more detailed information including a demo, just email us at info@thecoresolution.com

“

Out of the box, CORE Vault makes you compliant with 82 of 110 NIST/CMMC requirements. For the remaining requirements, our experts provide hands-on support to help you achieve your maximum SPRS score and help you prepare for CMMC certification.

Scott Dawson | CEO

- Vulnerability Scanning
- Web Filtering
- Multifactor Authentication (MFA)
- Antivirus/Endpoint Detection and Response (EDR)
- Secure Encrypted File Sharing
- Data Loss Prevention (DLP)
- Incident Response support
- CORE Security Suite
- Ability to support local printing and data exchange for your operational technology (CNC machines, etc.), if needed
